

Project Profile

UL508A Panel Shop

At Industrial Automated Systems, we boast a UL508A panel shop equipped with extensive capabilities and ample capacity. Our seasoned technicians adhere to the latest codes and standards in constructing control panels for our clients. Our commitment to quality and craftsmanship is unparalleled.

IAS was contracted by a leading global energy solutions firm to manufacture a large quantity of RTU panels. They were meticulously assembled and rigorously tested at our panel shop in Wilson, North Carolina. The enclosures showcased indicate the size and scope of the project.

Innovate. Elevate. Excel.
